I design and lead product and experience systems for complex, real-world environments. My work covers enterprise platforms, AI-enabled tools, and customer-facing experiences. The focus is performance, clarity, and long-term impact through aligned teams, tools, and strategy.

Experience

Sutherland Global, Head of Design for Agent AI

2020–Present

Recruited to lead design for Conversational AI (chatbots); after the product manager's departure, my role expanded to lead product management for the company's first generative agent-assist tools.

- Spearheaded a lean team to launch the agent-assist AI platform, reducing average handle time by 22% while increasing agent satisfaction by 10%.
- Pioneered a service design methodology to navigate the complex 40,000-person organization, coordinating across client teams, service delivery, and technology leaders to shift product strategy from "making old processes faster" to reimagining core workflows.
- Drove the product lifecycle from research to adoption, defining the roadmap and vision that secured critical cross-functional buy-in.

Sortly, Senior Director, Design

2021–2023

- Drove the 0-to-1 redefinition of the core product experience, directly influencing the product roadmap, pricing, and packaging to meet key revenue and engagement targets.
- Established a generative, research-driven culture that prioritized solving customer problems over building features, leading to increased adoption.
- Revamped brand and messaging across all marketing channels, resulting in a dramatic increase in qualified organic leads.

Hired, Head of Design

2018–2020

- Led the design effort behind the rollout of Hired's marketplace strategy, realizing products that delivered 25% of company revenue in their first year.
- Established a research-driven, human-centered design (HCD) framework that set a higher quality bar across both marketing and product.
- Created a unique framework for codifying and extending Hired's design language, driving measurable efficiencies across the development process.

TripAdvisor, Director of Design

2016–2018

- Guided the transition of the designers, marketers, researchers, and developers into an agile environment, effectively developing practices that delivered rigor, velocity, and quality.
- Strategized across executives to plan and execute a unified direction for B2B, B2B2C, and B2C customers.
- Identified research/design-driven priorities to help successfully merge five legacy front-end platforms into a new, higher-converting product.

Udemy, Director of Design

2014–2016

- Defined the discipline of design for the company, including key principles, methods, and practices.
- Instituted processes for collaboration and knowledge sharing across organization levels, creating an environment of transparency and growth.
- Established the styles, patterns, and brand elements for brand and product, creating guidelines that enabled quality production at speed.

Yahoo, Design Director

2010–2014

- Led the large scale, front-end redesign of Mail and Calendar for an audience of 300 million customers.
- Transformed the team's culture, tools, and working models to increase performance, improve team development, and expand the group's portfolio.
- Strengthened the cross-discipline team via models that inspired deep thinking, ideation, efficiency, and strategic alignment.
- Worked across the Yahoo network to define hiring practices, charters, and review criteria to raise the quality of design.
